

**Belzer UW[®] Cold Storage Solution
(UW Solution)**

(Formulated for flushing and cold storage of
kidney, liver, and pancreas organs)

**WARNING: NOT FOR DIRECT INJECTION OR I.V. INFUSION
HIGH POTASSIUM CONTENT – RISK OF CARDIAC ARREST**

Electrolytes (mEq/L): Sodium 29, Potassium 125

Calculated Osmolarity: Approximately 320 mOsm

Belzer UW[®] Cold Storage Solution is sterile and non-pyrogenic. Use only if solution is clear and free of precipitate. Remove the overwrap and perform a visual inspection of the solution for particulate matter. Do not use this solution if obvious particulate matter, precipitates, or contamination are evident in the solution. If a leak is found, discard the entire container of Belzer UW[®] Cold Storage Solution as sterility may be compromised.

Single dose container. Store Belzer UW[®] Cold Storage Solution indoors at temperatures between 2° and 25°C (36° and 77°F). Avoid excessive heat. Do not freeze the solution and do not use if frozen. See package insert for complete information.
