Belzer UW® Cold Storage Solution
(UW Solution)

(Formulated for flushing and cold storage of kidney, liver, and pancreas organs)

Electrolytes (mEq/L): Sodium 29, Potassium 125
Calculated Osmolarity: Approximately 320 mosmol/kg

Warning: NOT intended for direct injection or I.V. infusion
High Potassium Content - Risk of Cardiac Arrest
Warning: NOT for in situ flushing of organs in living donors or patients
Warning: Discard any unused portions

Belzer UW® Cold Storage Solution is sterile and non-pyrogenic. Use only if solution is clear and free of precipitate. Remove the overwrap and perform a visual inspection of the solution for particulate matter. Do not use this solution if obvious particulate matter, precipitates, or contamination are evident in the solution. If a leak is found, discard the entire container of Belzer UW® Cold Storage Solution as sterility may be compromised.

Single dose container. Store Belzer UW® Cold Storage Solution indoors at temperatures between 2° and 25°C (36° and 77°F). Avoid excessive heat. Do not freeze the solution and do not use if frozen. See package insert for complete information.
